

GLUETEC GROUP

THE ADHESIVE EXPERTS.

MARINE PRODUCTS

FOR TREATMENT, CONSTRUCTION
AND RENOVATION.

Excellent solutions - for all kind of maritime applications in yacht and ship building.

The adhesives and sealants of WIKO® are suitable for different applications all around boats and ships. Our portfolio offers solutions for all types of applications regarding interior and exterior as well as on deck. Along with the adhesives and sealants we also offer a broad range of aerosols for maintenance and cleaning purposes. Your advantage is, that we can offer the whole package needed from one hand.

WIKO® MS POLYMER - BONDING and SEALING

WIKO® MS POLYMERS are 1 component bonding and sealing products for elastic layers. It is possible to fix different types of material.

- elastic, moisture curing bonding and sealing adhesive for applications around ships and yachts.
- uv-resistant & saltwater resistant
- free of isocyanates, solvents and silicones
- temperatur resistance -40 °C to +100 °C

WIKO® MS POLYMERS are suitable for exterior and interior applications. They are saltwater and uv-resistant, as well as they offer good resistance against rotting and they are paintable.

Applications:

- keel
- hatch
- deck fitting
- bulkhead
- mast
- pantry
- sealing of decks

WELDYX® MULTI CRAFT, MASTER 5 & 15 AND MULTI POWER 3 & 10.

WELDYX® MMA adhesives are fast-curing, flexibilized, structural two-component adhesives. Their consistency is pasty, which allows for easy and precise vertical and horizontal processing. They are suitable for mechanical fixing and provide excellent adhesion to a wide variety of substrates, including metals, plastics, glass and wood. These products are available with different open times to suit specific application requirements.

WIKO® MMA adhesives are suitable for a wide range of bonding applications in the shipbuilding industry, both indoors

and outdoors, including interior fittings, kitchens and toilets, but also for replacing rivets. For small components, we recommend adhesives with a short open time, and for large components, a long open time.

Applications:

- Bonding of keel to hull
- Bonding of deck to hull
- Bonding of bulkheads
- Repair work
- Installation of moldings, panels and brackets
- Subsequent installation and repair of struts
