REPAIR ADHESIVES

WIKO® REPAIR USER FRIENDLY SOFT

The repair professional for dynamic applications: flexible, safe, fast.

With the new WIKO® REPAIR UF SOFT you can master any repair. The optimised formula offers even more flexibility, faster sanding and maximum resistance. Developed for the requirements of car and commercial vehicle workshops, bodywork and vehicle construction as well as for repairs on buses, trains and aeroplanes, this polyurethane adhesive enables safe and durable bonding - even under dynamic conditions.

Customisable for your requirements

WIKO® REPAIR UF SOFT is available in three processing times (30, 90 and 300 seconds) and is therefore perfectly suited to a wide range of applications - whether bumpers, spoilers or interior panelling. The black colour ensures a clean, visually appealing finish, both inside and out.

State-of-the-art adhesive technology for the highest demands

- **Fast sandability - efficient reworking directly after application**
- **High flexibility & mouldability - ideal for strong vibrations**
- **Extremely resistant - secure bonding even under load**
- **Ultra-strong adhesion - suitable for plastics and metals**
- **Weather and media resistant - resistant to water, oil, fuel and solvents**
