STAFF HYGIENE

In the personal hygiene product category, the GLUETEC GROUP offers industrial and trade companies high-performance cleaning products that guarantee maximum effectiveness, practicality and user-friendliness. Particularly noteworthy is the **WIKO® POWER HAND CLEANER** – a powerful hand cleaner for stubborn dirt such as oils, greases, graphite or soot. Specially developed for use in workshops and industrial environments, it thoroughly removes even the most stubborn dirt while being gentle on the skin. Thanks to its economical formula, only a small amount is needed for thorough cleaning, which reduces consumption and enables potential savings in operation. In addition, natural perlite particles prevent drains from clogging – a practical advantage in everyday work.

The GLUETEC GROUP offers additional professional solutions with **WIKO® POWER HAND SOAP** and **WIKO® POWER SHOWER GEL**. **WIKO® POWER HAND SOAP** combines deep cleaning with maximum skin protection: the solvent-free, pH-neutral formula effectively removes oil and dirt without drying out the skin, making it ideal for frequent hand washing in production and workshops. It is available in a fragrance-free (Soft) version or with a subtle apple scent.

WIKO® POWER SHOWER GEL ensures refreshing, thorough cleanliness for skin and hair, even after a long day at work. It reliably removes stubborn dirt and odours without the use of aggressive ingredients and protects even sensitive skin from drying out with moisturising components, while the invigorating orange scent leaves you feeling fresh. The GLUETEC GROUP thus offers a comprehensive personal hygiene portfolio that optimally combines product safety, efficiency and care.

POWER HAND CLEANER

WIKO® POWER HAND CLEANER is a high-quality, medium-viscosity washing cream specially developed for medium to heavy soiling and for use several times a day. Unlike other hand washing pastes, WIKO® POWER HAND CLEANER's high-quality ingredients make it particularly powerful without attacking the skin. It reliably removes dirt from the hands caused by paints, fats, oils, soot, graphite, soil, printing ink, permanent marker, ink or metal dust. Natural orange oil gives this user-friendly hand cleaner a fresh and pleasant scent. The formulation is characterized by the following properties:

- **High-quality perlite scrubbing agents:** Natural exfoliating particles effectively cleanse the skin without irritating it. What's more, perlite does not clog drains.
- **Alkali and silicone free:** Avoids potential skin irritation and unwanted residue. Reduces the risk of skin dryness and allergies.
- **Very efficient:** Just a pea-sized amount is enough for a thorough clean. This hand cleaner is 90 % biodegradable, without microplastics, and therefore environmentally friendly.

Properties

- Powerful cleaning
- Gently on the skin and pH-neutral
- 90 % biodegradable
- Does not clog drains
