GLUETEC MIXING NOZZLE GLUEMIX

As with any mixer for two-component adhesives, it is recommended to dispense and discard a complete mixer length before the first use. This procedure ensures that only optimally mixed adhesive is used.

Due to the innovative design with additional mixing elements and the twisted tip, the new GLUEMIX mixing nozzle is 25% shorter than other comparable mixing nozzles. This means that significantly less material is lost with every application and every spout change - approx. 30% of high-quality adhesive can be saved in this way. A calculation that pays off from the very first cartridge!

The new brackets also allow a better handling when changing the mixer.

Test the new GLUEMIX mixer now and request your free sample.

Product	Item no.	PU
GLUEMIX transparent	MXK25/37/50t	10
GLUEMIX green	MXK25/37/50gr	10
GLUEMIX black	MXK25/37/50s	10
GLUEMIX blue	MXK25/37/50b	10
GLUEMIX red	MXK25/37/50r	10

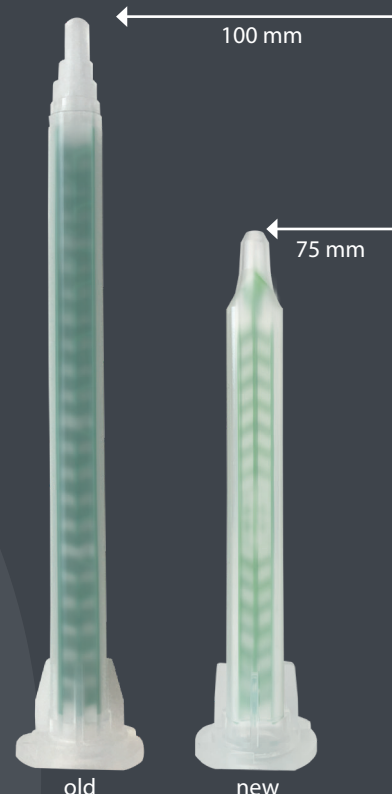

All mixers are suitable for the following mixing ratios: 1:1, 2:1, 4:1 and 10:1.

CUSTOMISABLE MIXERS*

From now on, the mixers can be customised with your company name. A special laser technology makes this possible. This way you do not only have your product in your own design, but also the matching accessories.

* Minimum order quantity: 100,000 pcs. (similar to illustration)
